Figure 1 is a line graph showing the temperature profile of the sample during heat treatment. The vertical axis represents Temperature in degrees Celsius (°C), ranging from 0 to 350 in increments of 50. The horizontal axis represents Time in seconds (sec), ranging from 0 to 280 in increments of 20. The curve starts at approximately 30°C at 0 seconds, rises to about 150°C at 80 seconds, then continues to rise more gradually to a peak of 255 ± 5°C at approximately 215 seconds. A horizontal double-headed arrow indicates a time interval of 60 ~ 120 seconds during the heating phase. A vertical double-headed arrow indicates a time interval of 5 ± 0.5 seconds at the peak temperature. The curve then drops sharply to about 100°C at 250 seconds.
